KINDERGARTEN

GROW · LEAD · IMPACT

At UTS, a kindergartener's world begins with

**THE LITTLE THINGS,  
LOVINGLY CARED FOR EACH DAY**

**Beyond learning, UTS offers children meaningful early-life experiences that lay a strong foundation for the future.**

We understand that the first five years of a child's life are critically important to their holistic development. With a heartfelt mission to nurture future global citizens ready for tomorrow, UTS is dedicated to creating a joyful, loving, and nature-connected environment where children feel confident to explore, learn, and begin shaping their very first life values.

# Built on a strong international curriculum foundation

UTS supports children balanced physical, intellectual and emotional growth.

## The Early Years Foundation Stage Curriculum Building strong first Steps for your child

Based on the **OIC Early Years Curriculum**, UTS focuses on nurturing children's holistic development through seven key areas of learning, ensuring they are confident and ready for their next educational journey.

### Literacy (Reading & Writing Skills)

The program lays a strong foundation for lifelong learning by introducing children to everyday language use and early literacy skills through engaging lessons and play-based activities, preparing them confidently for Primary School.

### Understanding the World

Through everyday observations and explorations, children gain insight into changes around them, sparking curiosity and a genuine interest in discovering the world.

### Mathematical Thinking

Through fundamental concepts such as recognizing, comparing, sorting, and classifying, children develop logical thinking, sharpen their awareness, and strengthen memory skills via hands-on games and creative activities.

### Expressive Arts & Design

Children explore different materials to create artistic works, listen to and feel joyful rhythms and melodies, and unleash their imagination—combining skills to express ideas creatively and confidently.

### Personal, Social & Emotional Development

We support children in discovering themselves and understanding their role within the community. Through daily interactions, they learn to connect, share, care for others, and nurture empathy naturally.

### Physical Development

Age-appropriate physical activities help children build flexibility and strength, supporting both fine and gross motor skills and laying the foundation for a healthy, active lifestyle.

### Communication & Language

With a rich variety of classroom communication activities, children gradually develop a love for language and gain confidence in expressing their feelings and ideas clearly and meaningfully.

# Oxford International Curriculum (OIC)

The kindergarten program at UTS is thoughtfully designed based on the **OIC Early Years Curriculum**, providing young learners with a strong foundation for their early development.

“Joy of Learning” is the central approach of the Oxford International Curriculum, developed in line with positive education trends and serving as the guiding philosophy for teaching and learning at UTS. With a focus on nurturing children across seven key developmental areas, the program offers rich learning content and engaging activities that prepare children confidently for Primary School.

The OIC program at UTS is designed as a seamless learning journey, closely connected to the progression pathways of higher grade levels within the UTS International School System. At the same time, it places strong emphasis on building solid foundations **through four core subjects**, equipping children with the competencies needed to continue their education at bilingual and international schools:

Science

Wellbeing

English

Mathematics

## Floppy's Phonics

From as early as 18 months\*, children begin to familiarize themselves with the pronunciation of letters and simple sounds, laying a strong foundation for native-like reading and writing skills through Floppy's Phonics – the British phonics program.

Floppy's Phonics sparks children's interest and helps them discover the joy of letters through lively, age-appropriate, and engaging learning activities. Through this natural and playful approach, children learn to recognize and pronounce sounds accurately, gradually developing strong reading abilities and language skills in the most natural way.

*\*Learning content is thoughtfully designed and adapted to suit each age group.*

## Talent Program

The programme is designed to nurture children's all-round development during their “golden years”, where they strengthen physical abilities and explore music, visual arts, and STEAM through joyful, hands-on experiences.

With a child-centred approach, the programme supports children in becoming more independent, building meaningful connections with their environment, and actively engaging in all five senses.

Through Project-Based Learning, children are encouraged to explore real-world situations, solve problems creatively, and develop critical thinking and teamwork skills in a natural and engaging way.

## Two Flexible Learning Pathways

### Building strong foundations and unlocking every child's potential

Criteria	Oxford Bilingual Program - OBP	Oxford English Program - OEP
English Learning Time	50% of instructional time Nursery – Preschool 1, 2: 15 periods Preschool 3: 20 periods	25% of instructional time Nursery: 8 periods Preschool 1, 2: 8 periods
Primary Language of Instruction	English and Vietnamese used in parallel	Vietnamese as the foundation, combined with English exposure
Expected English Outcomes	Confident and flexible use of English in communication and learning	Basic English reflexes, developing thinking skills and confidence in using English

# Children grow in nature and safety

## Learning Spaces

For children to grow happily, they need a green, nurturing, and loving environment. At UTS, classrooms and play areas are thoughtfully designed to connect closely with nature and are filled with natural light, allowing children to play, explore, and learn freely each day

Every corner at UTS is created to meet strict safety standards and age-specific needs. Classrooms are equipped with modern, internationally standardized learning materials, supporting children's understanding through hands-on, real-life experiences.

## From little experiences to a journey of discovery

Beyond learning, UTS provides children with opportunities to explore and experience the world through all their senses, both inside and outside the classroom.

Through excursions and field trips, children broaden their perspectives and discover the world around them in a vivid and meaningful way. In addition, a wide range of experiential activities, school events, and cultural celebrations help children develop a sense of identity, respect for cultural diversity, and confidence to engage with the global community.

# UTS is a caring community

For a child to grow up happy, it takes the support of an entire community. At UTS, our team of dedicated educators and staff, our “nurturers”, work together to create a safe, caring, and respectful environment that honours each child’s individual pace of development.

Our nurturers provide children with the freedom to explore within a secure setting, offering guidance and gentle support only when truly needed. Through this approach, children gain the confidence to complete the tasks they choose, gradually building independence and developing essential life skills.

## UTS makes school a happy home

At UTS, every child is cared for and supported according to their own pace of development, ensuring they grow strong in both physical and emotional wellbeing.

Children’s health is thoughtfully nurtured through daily meals prepared on campus, meeting strict food safety and hygiene standards. Regular physical activities and routine health check-ups are carried out to monitor each child’s development and provide timely support at every stage of their growth.

Through daily care and thoughtful attention,  
**UTS walks alongside children, nurturing,  
guiding, and opening the door  
to an inspiring journey of growth.**
